Smart Display

RAZ Mobility

Unparalleled Hands-free Control

The Lenovo Smart Display is an unprecedented device for individuals with mobility disabilities. Using Google Assistant, the Smart Display can be controlled entirely by voice, providing individuals with mobility disabilities incredible capabilities. The user can enjoy video calls, voice calls, listening and watching entertainment, viewing photos, managing a calendar, controlling their smart home environment and much more. And all of this is enjoyed on a gorgeous 8-inch display and with excellent sound quality!

What it can do:

The Lenovo Smart Display offers users numerous capabilities. These include the following:

- Make and receive video calls anywhere in the world
- Make voice calls anywhere in North America
- Listen to music
- Listen to podcasts
- Listen to audio books
- Listen to the radio
- Listen to the latest news
- Search the web
- Display and search for photos
- Watch videos and other content on YouTube, YouTube TV and HBO.
- Control and monitor your home
- Manage your calendar, including creating events and setting reminders.
